About us: Origin and Evolution

800+
Energy projects completed

25+
Countries

12GW
Track record

Rodrigues Family

Overview

We emerged from a well-established Portuguese conglomerate, named **CJR Group**, with over half a century of experience in sectors such as civil construction, EPC, and real estate.

GreenVenture is a private investment and asset management firm focused on the identification, acquisition, development, and implementation of renewable energy projects.

Our Services and Value-added

Origination & Development

Expertise in the development of early-stage solar and wind energy projects. Identification of green field projects

Implementation

We oversee all phases of our projects until Commercial Operation Date, from regulatory licensing to engineering, procurement, and construction contracts

Financing

Adaptive approach to project financing and fund generation.

Asset Management

Management services cover PPAs, contracts with end-customers, and strategic positioning within the electricity market.

Value proposition for Mozambique

Utility scale generation projects - urban areas

Mozambique has an abundant and unexploited solar and wind resources which could be translated into utility scale projects to supply electricity to cities.

Mini-grid and off-grid solutions – rural areas

Green Venture is capable of building, financing and delivering off-grid systems to many villages in Mozambique helping to increase energy access in the country.

“Proactively Fostering Sustainability, High- Level Performance, and Humanity in the Green Sector”
