# Introduction

## Who we are

- Lead developer/investor of infrastructure projects
- 25 professionals in 5 global offices with expertise in project development, investment, finance, engineering, operations, legal, and environmental, social, and governance (ESG) practices.
- Solid track record of delivering greenfield infrastructure projects and managing through the full development cycle.
- Builds strong partnerships w/governments, communities and industry and applies commercial & entrepreneurial knowledge to bring greater access to vital services incl: electricity, transport links, drinking water and sanitation services.

## What we do

- Multiple sectors, throughout the entire life-cycle of infrastructure, from development to construction to operations.
- Core sector expertise:
  - Power and Energy – power generation across conventional and renewable technologies, transmission, distribution
  - Transportation – airports, ports & harbors, waterway transport, rail and road
  - Water and sanitation

### Development

- eleQtra has managed or is managing early and late stage development of >12 projects with total est. project value of over \$2.5 billion.

### Financing

- As lead developers, eleQtra has raised 3<sup>rd</sup> party equity and debt financing for 4 projects representing nearly \$1 billion in value.

### Construction

- eleQtra has helped manage the construction of several projects, including the Cabeolica Wind project and the Kalangala project.

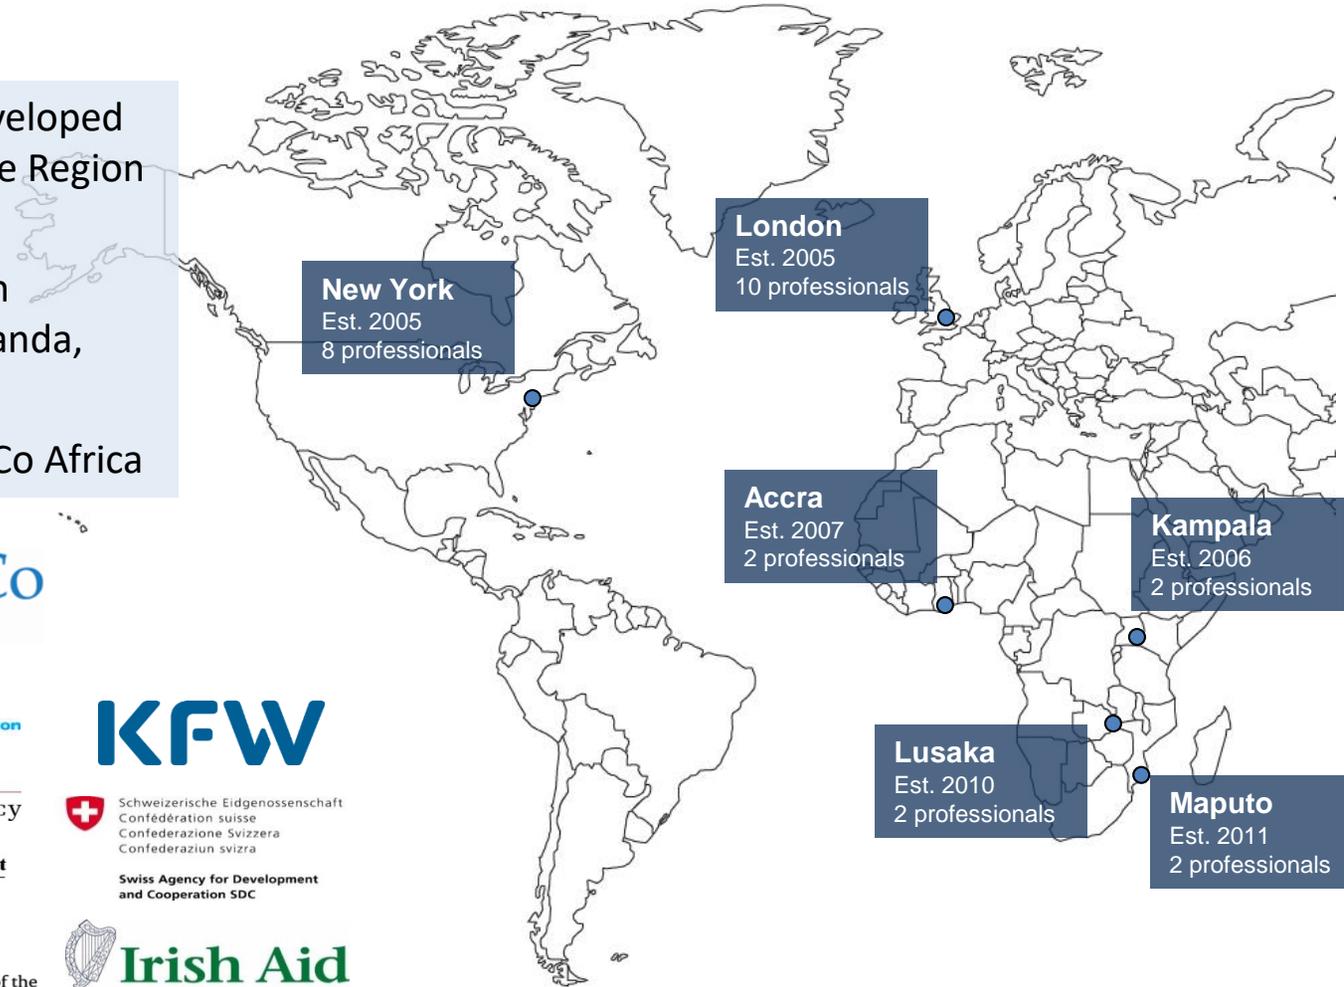

### Operations

- eleQtra manage operations and maintenance at the Kalangala project.
