REN ANGOLA 2027

Organisation

ORGANISATION

ASAER
Associação Angolana de Energias Renováveis

CO-ORGANISATION

Aler

INSTITUTIONAL SUPPORT

GOVERNO DE ANGOLA
Ministério da Energia e Águas

FRAMEWORK

An energy sector undergoing structural transformation

CONTEXT

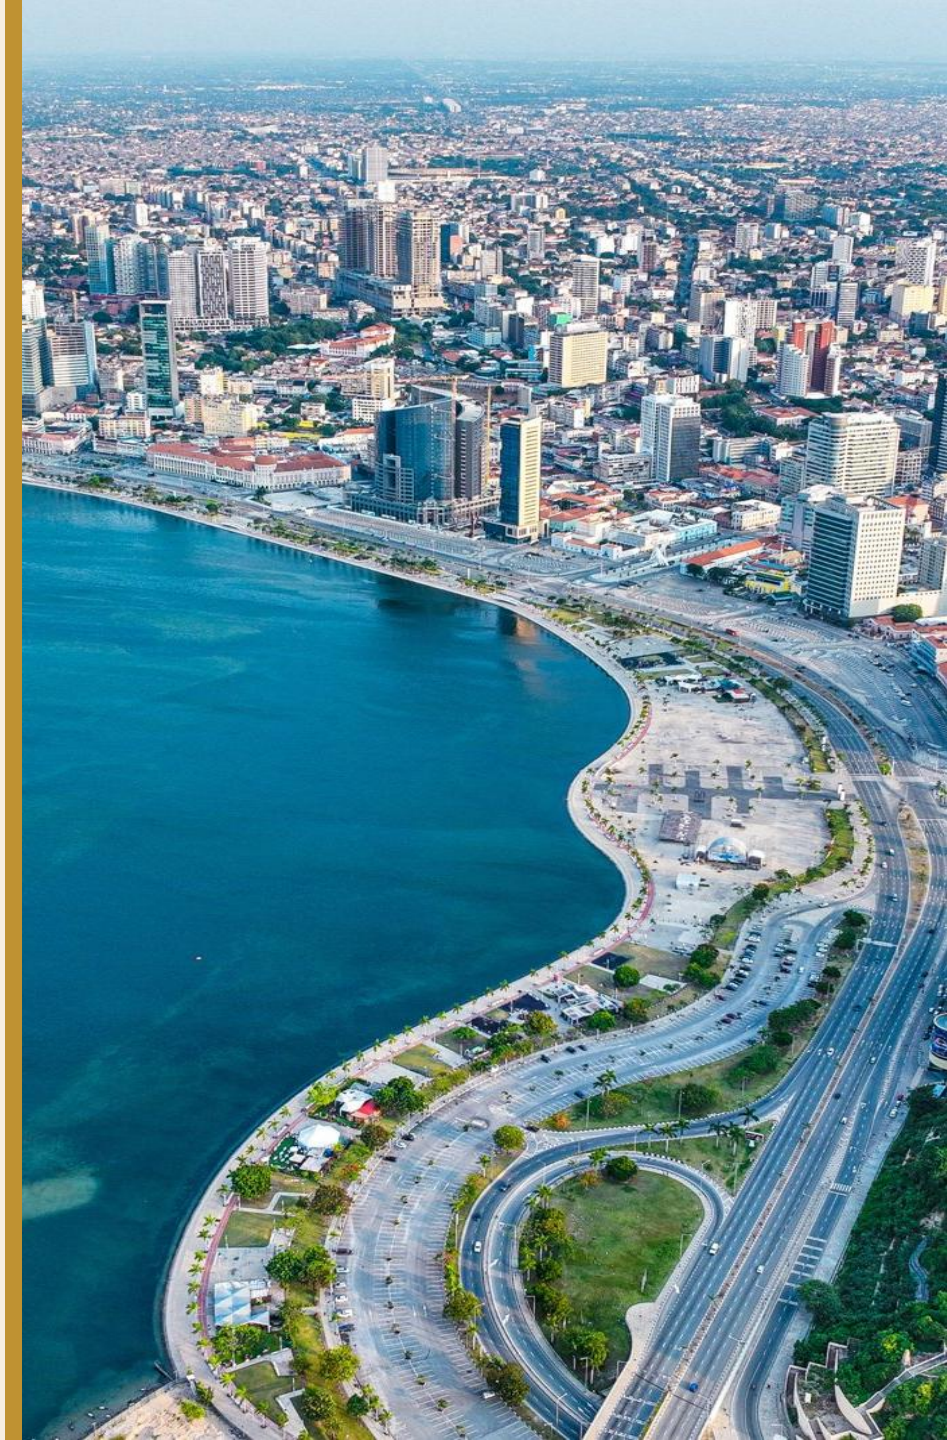

Angola faces challenges of access, reliability and financial sustainability in its electricity system, but also **growing opportunities for investment** and for connecting energy to the productive sectors.

OPPORTUNITY

More flexible energy models, geared towards the real economy, have a direct impact on productivity and competitiveness. Industry, agriculture, mining, tourism and digital are looking for predictable costs and security of supply.

RESPONSE

REN Angola is a **business forum for dialogue** between companies, investors, financiers, partners and the public sector, aligned with Angola's sector strategies and policies and with major national projects such as the Lobito Corridor.

THE FORUM

Renewable energy as a driver of economic development

Inspired by the success of **RENMOZ** in Mozambique and following the 2022 Angola Renewable Energy Conference, organised by ALER and ASAER with the support of MINEA, REN Angola positions renewable energy as a solution for energy access and as a driver of industrialisation, productive electrification and regional integration.

This first edition is dedicated to the framework and the business opportunity of productive self-consumption in Angola.

1st
edition

2 days
25–26 January 2027

~200
participants

Luanda
Angola

OBJECTIVES

What REN Angola promotes

1.

The **business opportunity of self-consumption** for the productive sectors of the economy

2.

The **institutional, legal and regulatory** framework for self-consumption in Angola

3.

The role of commercial banks and **financing solutions**

4.

Identifying **concrete business and investment opportunities**, with a focus on the Lobito Corridor

5.

Matchmaking B2B and B2G between companies, investors and government

6.

Networking moments among participants

THEMES

Self-consumption across the productive economy

SELF-CONSUMPTION					
INDUSTRY	MINING	AGRICULTURE	TOURISM	DIGITAL	RESIDENTIAL AND COMMERCIAL

CROSS-CUTTING SECTOR

Banking and Financing

Financing solutions that make self-consumption profitable across all sectors.

REGIONAL CASE STUDY

Lobito Corridor

A specific regional project where all sectors come together, showing **self-consumption opportunities in practice along the corridor**.

VALUE PROPOSITION | OTHER SECTORS

REN Angola’s value beyond energy

INDUSTRY

Predictable costs

Less exposure to tariffs and grid failures.

MINING

Less dependence and lower costs

On-site generation in remote locations.

AGRICULTURE

More output and fewer losses

Reduced losses in irrigation and storage.

TOURISM

Reliability and reputation

Continuous power and sustainability certifications.

DIGITAL

24/7 availability

Stable, renewable power for data centres and telecoms.

WHY ENGAGE

sectors beyond energy?

They are the demand.

Self-consumption starts with the companies that consume energy; without them there is no market and no projects.

They make projects bankable.

Creditworthy clients give banks the confidence to lend.

Presenting business cases

Boosting access to and interaction with suppliers, financiers,

AGENDA AND FORMAT

Built for private sector projects and partnerships

The country's key players – from energy, industry, mining, agribusiness, tourism and digital – brought together in one room, with an audience of **around 200 participants**.

→ Institutional panels;

→ Thematic and sector panels:

→ Dedicated B2B and B2G spaces;

→ Networking areas;

PROGRAMME

A multi-sector programme responding to the real needs of the productive sectors

25 January

morning

- Opening Cerimony
- **Institutional and regulatory framework**
- Energy for **Industry**
- Energy for **Mining**

afternoon

- Energy for **Tourism**
- Energy for **Agribusiness**
- Energy for **Digital**
- Energy for **Residential and Commercial**

26 January

- **Banking and financing**
- **Lobito Corridor**
- Closing Session
- Technical visits – to be confirmed

REN Angola aims to establish itself as a key platform connecting strategic vision, financing and implementation.

ORGANISATION

Meet the organisations involved

ASAER – Angolan Renewable Energy Association promotes renewable energy in Angola to reduce the population's energy access deficit and contribute to the country's socio-economic development, guided by the principles of environmental sustainability.

ALER is a non-profit platform for energy and climate cooperation, working at national, regional and international level. It produces knowledge, mobilises investment and builds partnerships to accelerate energy transitions in Portuguese-speaking countries – a reference partner for governments, companies and financiers.
